Work Experience

Project Lead | Frontend Developer | ICS Engineers & GEC | LINK   **December 2024 – January 2025**

- Lead a team of four developers in building a commercial website for ICS Engineers
- Managed timelines, delegated tasks and facilitated collaboration to successfully deliver the project
- Developed the frontend using React.js and Tailwind CSS ensuring modern and responsive UI
- Integrated APIs for seamless data fetching and dynamic content updates

Project Lead | Frontend Developer | Techfluence & GEC | LINK   **February 2025 – March 2025**

- Led the development team in building the official website for Techfluence 2025, Goa's biggest college tech fest
- Designed a modern, responsive UI using React.js and Tailwind CSS to ensure seamless access across all devices
- Collaborated with coordinators to integrate dynamic content and enable real-time event updates
- Successfully handled high user traffic of over 1,400 visitors, resulting in approximately 500 total event sign-ups through the platform

Projects

Tunes | Music Streaming Application | LINK   **July 2024 – September 2024**

- Built a music web app with user authentication, song uploads, and social features
- Implemented search functionality for discovering friends' accounts & personalized song preference
- Integrated genre-based music discovery, top charts, and artist insights

ChatBytes | Real-time Chat Application | LINK   **January 2025 – February 2025**

- Developed a real-time chat application with Socket.io for seamless messaging
- Implemented multi-factor authentication to enhance security and user verification
- Designed an intuitive UI for smooth user interactions and chat management

Achievements

HackOverflow Runner-up | IIT GOA | LINK   **January 2025**

- Built a web app to streamline the college placement process for recruiters, colleges & students
- Enabled real-time tracking of placements with dedicated portals for all stakeholders
- Developed an automated notification system to keep users informed about placement updates

Goa Police Hackathon Finalist | BITS GOA | LINK   **October 2024**

- Built E-Bandobast, a digital tool for police officials to manage deployments using geotagging
- Intuitive interface for efficient planning, monitoring, and execution of bandobast operations
- Implemented a real-time reporting system for officers to flag suspicious activities and request backup

HackIndia Hackathon Regional Top 8 Finalist | GEC | LINK   **February 2025**

- Built a Fiverr-like freelance platform with AI-powered proposal suggestions for smarter pitching
- Integrated real-time chat functionality for seamless communication between clients and freelancers
- Developed backend APIs using Node.js and Express, handling user authentication, proposal logic, and message routing
